

Amended Claims with Editing Marks

31. (twice amended) A window sash assembly comprising:
- a sash having a header rail and a stile joined at a corner and having an opening in the sash;
- a tilt latch disposed in the opening including a housing having side walls, a rear wall, and a bottom wall;
- a top wall extending beyond the side walls and rear wall to define a flange;
- a protuberance projecting from each of the side walls, each protuberance having a pointed apex spaced from the flange to define respective gaps for receiving the edges therein, wherein said pointed apex ends in a point or sharp angle; and
- a bolt movably disposed in the housing and adapted for engaging a slide channel.
